KIT TUBAZIONI FRENO BRAKE HOSES KIT

I nostri kit tubi sono composti con il sistema Global System. Global System è un sistema molto versatile che permette di comporre il kit a proprio piacimento. I kit identificati da *sono kit con raccordi pressati w.m./ergal ad esaurimento.

COME ORDINARE UN KIT TUBI...

Per ordinare nella maniera idonea, occorre utilizzare il codice della motocicletta ed integrarlo con lettere relative al colore dei tubi e numeri riferiti al materiale dei raccordi. Seguite la tabella sottostante per procedere correttamente.

Our brake hoses kits are made by Global System components. Global System is a very simple and flexible system that allows to compose kits for any kind of application (and not only for two wheels). All kits marked with * are still made with pressed fittings.

HOW TO PLACE AN ORDER...

Here is an example of how to define a kit code: check the application and find the CODE (ex. 6AP100 for the Aprilia RSV1000 98→00), add the hose identification COLOR LETTER and fitting identification TYPE NR.

Colore tubo / Hose color	Codice colore / Color code	Raccordi / Fittings	Codice raccordo / Fittings code
Trasparente/Clear	A	Ottone W.M./White Metal Silver	1
Rosso/Red	B	Ottone Gold/White Metal Gold	2
Blu/Blue	C	Ottone Nero/White Metal Black	3
Carbon Look	D	Ergal Blu/Blue light alloy	4
Nero/Black	E	Ergal Rosso/Red light alloy	5
Verde/Green	F		
Bianco/White	G		

Esempio:

Quindi un kit per Aprilia RSV 1000 98→00 con tubi BLU e raccordi ottone Gold diventerà:
6AP100 + C + 2 = 6AP100C2 questo è il codice che dovete ordinare

Qualora non troviate il kit per la vostra moto contattateci.

Example:

So, the complete code for an Aprilia RSV1000 98→00 hoses kit with Blue hoses and Gold fittings will be:
6AP100 + C + 2 = 6AP100C2

In case you don't find your application, please contact us.

N.B. La scritta Ant./Post. indica che il kit include sia le tubazioni anteriori sia la posteriore.

N.B. F/R means that kit includes Front & Rear hoses and fittings

TECHNOLOGY FOR SPORT

GLOBAL SYSTEMS®

Occhio con Canalina di tenuta/
Seal Channel with Eyelet

Il più nuovo, affidabile e semplice sistema per montare tubi in treccia metallica. I tubi sono disponibili in varie lunghezze ed è già pressata la ghiera. Voi dovete solo scegliere la lunghezza del tubo, il tipo di raccordo e avviare il tutto. In un attimo il vostro tubo è pronto per essere montato. L'esclusivo sistema di tenuta, omologato DOT, garantirà la massima affidabilità. Veramente un gioco da ragazzi. I raccordi sono identici a quelli usati dal sistema B.H.® e quindi evitano un doppio magazzino. Sono disponibili tubi Global System® anche per moto da fuoristrada con guaina rigida già inserita.

Questo nuovo sistema consente di usufruire delle medesime garanzie di qualità delle grandi produzioni di serie, anche per ordini di piccola entità in quanto il processo produttivo sfrutta gli stessi macchinari ed è sottoposto agli identici standard di controllo delle produzioni destinate ai più prestigiosi costruttori di auto e moto.

Assorbimento min. garantito a 70 bar: 0,230 cc per mt lineare.
Assorbimento min. garantito a 105 bar: 0,290 cc per mt lineare.
Scoppio minimo: 900 bar.
Raggio min. di curvatura: 20 mm.
Strappo dei raccordi alla prova di trazione: 230 Kg.
Temp. max interna: +240°C.
Temp. min. interna: -50°C.
Peso mt. lineare: gr 66.
Dimensioni: 3x7 mm.

Sistema di pressatura brevettato/
Patented locking System

Tubo B.H. (PTFE + Treccia Inox)
omologato DOT SAE J 1401/
B.H.® Hose (PTFE + Braided Stainless)
Conforming to DOT SAE J 1401

Connessione a doppia tenuta brevettata/
Connection with patented double seal

This is the newest, easiest and safest system to fit stainless-steel embroidered brake-lines. The lines are available with different lengths and have a connection pressed on them. You have only to choose the length of the brake-line, take the needed fittings and screw them on. In a wink your brake-line is ready to fit. The exclusive seal system, DOT approved, grants the highest safety. It is child's play. The fittings are the same used by B.H.® system and in this way the stock is reduced. Global System® brake-lines for cross are also available: they are provided with a rigid sheathing.

Con un minimo investimento ed un ridotto stock si può creare un magazzino che soddisfi tutte le esigenze della clientela, anche le più particolari. Le soluzioni tecniche più ardite troveranno la giusta risposta ad un giusto prezzo. La possibilità di fornire un tubo già assemblato e pertanto con tutte le caratteristiche di sicurezza soddisfatte (collaudo, responsabilità e omologazione), rendono il Global System la soluzione vincente.

È noto che i tradizionali tubi in gomma sono soggetti a degrado con l'invecchiamento. Il nostro tubo in PTFE trecciato inox non subisce alcuna caduta prestazionale con il passare degli anni, in quanto le caratteristiche chimico-fisiche dei materiali che lo compongono ne garantiscono una durata illimitata.

Affidabilità/Reliability

This new system guarantees the same quality standard of mass production also for small orders. The production process runs on the same machinery and conforms to the standards in use by the most prestigious car and motorbike manufacturers.

Le Prestazioni/Performance

Min. guaranteed absorption 70 bar: 0,230 cc per linear metre.
Min. guaranteed absorption 105 bar: 0,290 cc per linear metre.
Min. burst pressure: 900 bar.
Min. bending radius: 20 mm.
Traction resistance of fittings: 230 Kg.
Max. internal Temp.: +240°C.
Min. internal Temp.: -50°C.
Weight per metre: gr. 66.
Dimensions: 3x7 mm.

La Versatilità/Versatility

You need a min. investment to create a stock that meets even the most demanding customer requirements. The most daring technical request will find the right answer at the right price. You will be able to supply a ready assembled brake hose with all safety requirements (testing, responsibilities and certification). This makes the Global System the winning solution.

La Durata/Durability

It is well known that traditional rubber hoses are subject to wear over time. Our hose in braided stainless steel PTFE doesn't deteriorate over the years, the physical and chemical material specifications guarantee unlimited use.

Istruzioni di Montaggio

1- Bloccare il raccordo in morsa facendo attenzione a non danneggiare i piani degli occhielli (utilizzare delle ganasce morbide).
2- Applicare sulla filettatura del raccordo del frenaflessi (tipo LOCTITE 243), avendo cura che lo stesso non vada a contatto con l'anello di tenuta presente all'interno della ghiera posta all'estremità del tubo.
3- Avvitare la ghiera sul raccordo, applicando una coppia di serraggio di 10 Nm (1 Kgm).

N.B.: Per i raccordi in lega leggera questa deve essere ridotta a 8 Nm (0,8 Kgm).

4- In caso di smontaggio del raccordo, pulire perfettamente la filettatura ed assicurarsi che l'anello di tenuta della ghiera sia integro. In caso contrario sostituirlo solo con uno di ricambio (Cod. GS3694). Non utilizzare anelli in NBR in quanto non compatibili con il fluido freni.

Assembly Instructions

1- Clamp the fitting in the vice being careful not to damage the banjo surface (use soft jaws).
2- On the fitting thread, apply some LOCTITE 243 in a way that it does not get in touch with the seal ring inside the ring nut at the end of the hose.
3- Screw the ring nut on the fitting applying a 10 Nm (1Kgm) tightening torque.
N.B.: For light alloy fittings, the tightening torque has to be reduced to 8 Nm (0,8Kgm).

4- In case of fitting disassembly, clean the thread thoroughly and check the integrity of the seal ring. If necessary, replace with an original spare part only (Code GS3694). Do not use NBR seal ring as they are not compatible with the brake fluid.

TUBI FRENO PER RACCORDI GLOBAL SYSTEM® HOSES FOR GLOBAL SYSTEM® FITTING.

FILTRI OLIO

Filtri Olio ad Alta Tecnologia.

MOLLA

Realizzata con materiale eccellente, mantiene il corretto accoppiamento tra cartuccia e corpo.

VALVOLA BY-PASS

Permette il flusso d'olio di sicurezza anche in caso di alta differenza di pressione (filtro intasato).

SPIRALE

Grazie alla sua conformazione, sostiene l'elemento filtrante e consente il migliore flusso d'olio possibile.

CARTUCCIA

Le specifiche costruttive forniscono un elevato rapporto tra grado di filtraggio e durata del filtro stesso.

VALVOLA NON-RITORNO

Impedisce gli eventuali flussi di ritorno nel circuito di lubrificazione.

FONDELLO

Doppio sistema di aggancio tra piattello e corpo, per garantire la massima resistenza alle sollecitazioni meccaniche.

TENUTE

Guarnizioni a profilo quadro, evitano perdite ed assicurano i corretti flussi interni al filtro.
